**Categories:** For FOIA response

Dylan,

She just said the odor was generally intermittent (yet consistently) noticeable along Peterson Road where the trucks exit the Moore facility driveway, and she attributed it to Savoy's operations there. I don't have a more specific time frame, but I asked the citizen to keep in touch, and if she notices any odors in the future, to note the time, date, exact location, and to attempt to characterize the odor (e.g. burnt, petroleum-like, sulfur, sewage, etc.) so we may have a better chance of locating the source.

I will let you know if I hear more.

Thank you for looking into this.

Natalie,

Thanks again for the phone call explaining the additional request for information.

I spoke with our operations manager regarding what may have caused the odor complaint you recently received. There have been no events that he was aware of that would explain the complaint. You mentioned the person calling-in the complaint was located near the Moore facility. If you had any more specifics on the location of the odor, please let me know. It could help me to pinpoint any operations issues that may exist.

Thanks,

Dylan Foglesong

**Subject:** Request for Information

Dylan,

I wanted to give you a heads up that this additional request for information went in the mail today. I will also give you a call to discuss.

Thanks,

Natalie
